

EDUCATION

New York University <i>Ph.D. in Computer Science</i>	New York, NY <i>September 2026 - June 2031</i>
University of Oxford <i>M.Sc. in Advanced Computer Science</i>	Oxford, UK <i>October 2025 – August 2026</i>
Unviersity of California Irvine <i>B.Sc. (Hons) in Computer Science</i>	Irvine, CA <i>September 2021 – June 2025</i>

RESEARCH EXPERIENCE

University of Oxford / Nokia Bell Labs <i>Research Assistant w/ Jakob Foerster</i> - Post-trained LLMs using SFT and RL alongside a custom tokenizer in order to improve emulation performance. - Performed multi-agent reinforcement learning experiments to learn emergent network protocols. - Presented work to higher technical management at Nokia Bell Labs and secured 50,000 GBP in funding for lab.	Oxford, UK <i>July 2025 – June 2026</i>
University of California Irvine <i>Research Assistant w/ Roy Fox</i> - Paper in submission on benchmarking complex multi-agent RL with tractable optimality. - Experimented with the aim of leveraging offline data to accelerate large-scale multi-agent reinforcement learning tasks.	Irvine, CA <i>October 2024 – June 2025</i>
University of Oxford <i>Research Assistant w/ Jakob Foerster</i> - Independently proposed a project to Prof. Foerster, leading to a fully-funded internship. - Led writing, experimental design, and method design for a paper on utilising min-max optimisation to derive theoretical guarantees for unsupervised environment design, published at Reinforcement Learning Conference 2025.	Oxford, UK <i>June 2024 – March 2025</i>

RESEARCH PAPERS

An Optimisation Framework for Unsupervised Environment Design Nathan Monette, Alistair Letcher, Michael Beukman, Matthew T. Jackson, Alexander D. Goldie, Jakob N. Foerster Reinforcement Learning Conference 2025	[View]
Data-Augmented Game Starts for Accelerating Self-Play Exploration in Imperfect Information Games JB Lanier*, Nathan Monette*, Roy Fox arXiv (May 2026)	[View]

INVITED TALKS

Trace-Free Learning of Network Protocols Extended talk given to higher research management at Nokia Bell Labs.	2026
An Optimisation Framework for Unsupervised Environment Design Oral talk and poster presentation at Reinforcement Learning Conference 2025.	2025
What Does Game Theory Teach Us about Open-Endedness? Extended talk at the 2025 London Open Endedness Summit at Imperial College London.	2025

SERVICE

UC Irvine Computer Science Department Curriculum Committee <i>Student Representative</i> - Served as the sole representative of over 2,000 undergraduate students to a faculty committee in charge of curriculum design. - Authored the first draft of the department’s new undergraduate degree requirements (now implemented). - Presented community feedback in course evaluation and design from around 100 students and alumni.	Irvine, CA <i>September 2023 – June 2025</i>

HACKATHONS

UK Government AI Incubator Hackathon

London, UK

Perf-nect

November 2024

- Awarded finalist in government sponsored AI hackathon related to energy sustainability and governance.
- Cooperated with a team of 4 UK government researchers on creating an app to handle applications for resources to join the national power grid.
- Implemented a Bradley-Terry preference model to create a human-in-the-loop system to accelerate processing of a large backlog of applications.
- Invited to present our work at 10 Downing Street to UK Prime Minister Keir Starmer.

Hack at UCI

Irvine, CA

ZotScheduler

February 2023

- Achieved a second place prize out of over 60 teams, with over 400 total participants in the hackathon.
- Cooperated with two teammates to construct a working app in less than 36 hours.
- Utilized ensemble tree regression models (XGBoost), and search algorithms to recommend schedules to students based on a list of potential classes.

TECHNICAL SKILLS

- **Programming Languages:** Python, SQL, JS, C++
- **ML/AI:** PyTorch, JAX, Reinforcement Learning, Game Theory, Optimisation
